

Established as a nonprofit in 1997, Mary Crowley Cancer Research specializes in conducting early-phase solid tumor oncology trials.

Our diverse team of physicians, clinicians, and research professionals have a passion for offering innovative, personalized options for cancer patients.

Our expertise allows us to open a clinical trial within 8-12 weeks, faster than the industry average of 6-8 months.

MCCR By The Numbers

- Studied 21 cancer drugs that are now FDA-approved treatments.
- Managed more than 800 clinical trials.
- Enrolled over 7,600 patients in clinical trials.
- Worked with 336 leading global pharmaceutical companies.
- Contributed to 164 first in human trials.

Accelerated Approach to Cancer Research

- Competitive trial development timelines with prompt and comprehensive compliance review.
- Access to Texas Oncology, one of the largest oncology groups in Texas with more than 420 affiliated physicians.
- Molecular Registry with more than 900 patients, genomic alterations documented and reportable for rapid trial enrollment.

For more than 25 years, Mary Crowley Cancer Research has been delivering investigational therapies for some of the rarest forms of cancer. An independent nonprofit oncology research center, our mission is to bring HOPE to cancer patients through innovative clinical trials while advancing treatments for patients in the future.
