About Mary Crowley Cancer Research

Mary Crowley Cancer Research is an independent, nonprofit oncology research center delivering investigational therapies one patient at a time. Our mission is to bring HOPE to cancer patients through innovative clinical trials while advancing treatment for patients in the future.

Established in 1992, Mary Crowley has conducted 800+ clinical trials for 7500+ patients in collaboration with 325+ different pharmaceutical partners. Mary Crowley is designed, equipped and staffed for conducting solid tumor oncology trials ranging from early to late phase. Our diverse team of physicians, clinicians and research professionals have a passion for offering innovative, personalized options for our patients.

An Accelerated Approach to Cancer Research

Study Start-Up

- Competitive trial development timelines, approximately 10 weeks to open from receipt of final protocol (can be shortened)
- All start-up activities completed in parallel
- Local IRB meets weekly, allows for prompt trial review/approval

Patient Population

- Access to the largest community oncology group in Texas (Texas Oncology), with more than 420 affiliated physicians
- Molecular Registry with more than 900 patients, genomic alterations documented and reportable for rapid trial enrollment
- Oncology Outreach team to educate community oncologists of the trials/technology

Trials

- 160 First in Human trials have been conducted at Mary Crowley Cancer Research
- 21 Cancer drugs studied at Mary Crowley Cancer Research are now FDA approved treatments

Medical City Dallas Clinic

- Dedicated research clinical staff (CRNs, CRC, PharmD and supporting personnel)
- 13 infusion chairs
- BSL II compliant isolation rooms
- Integrated research-only pharmacy
- Specialized laboratory processing

Administration

- 16,310 sqft office located within walking distance to Mary Crowley Cancer Research Clinic
- Dedicated research employees (Finance, Legal, Project Management, Regulatory, IRB, Marketing/Business Development, Leadership)
- Monitoring suites with high-speed internet access
